Find Confidence in the Face of Uncertainty

The optimizers from LINDO Systems can help you navigate uncertain times. They give you the tools you need to examine and analyze the impact of possible scenarios. So, you can find the optimal path no matter what the future holds.

There are easy-to-use tools for

- Parametric analysis,
- K-Best solutions for easy access to all multiple optima and near optimal solutions,
- Tornado diagrams and other charting tools for analyzing the effect of various uncertain parameters,
- Scenario management tools,
- Fuzzy and Robust Optimization,
- Stochastic optimization for rigorous representation of uncertainty

LINDO optimization tools are available for a variety of front-ends, including GAMS, LINGO, MPL, the What'sBest! add-in to Excel, and various industry specific, customized frontends. Don't leave things to chance. Contact LINDO Systems for more information.
