

Tired of Wrestling?

Stop grappling with your complicated, clumsy modeling system.

Team up with LINDO Systems software to achieve the upper hand. We have user interfaces that are so straightforward and easy that you'll be building your first model within minutes of installation. Yet they have the depth of features and performance to handle your most difficult problems.

You

Your Modeling System

Why learn a new modeling environment, when you can use one you already know? What'sBest! allows you to leverage your knowledge of Excel to rapidly build large scale optimization models. Lay out models in a free format using standard Excel equations. Organize large models easily over multiple sheets of an Excel workbook. What'sBest! is just what you need for building models that clients and managers are comfortable using. It allows you to provide complex optimization models in an environment that is familiar to both technical and non-technical users.

Prefer the power and elegance of a modeling language? You won't find one easier to learn and utilize than LINGO. Express your models in a straightforward intuitive manner – much like you would with pencil and paper. Models are easy to build, understand, and maintain. LINGO takes the time and hassle out of managing your data. Pull information directly from databases and spreadsheets, and send solution output right back to the database or spreadsheet, making it easier for you to generate reports in the application of your choice.

LINGO and What'sBest! are available with a comprehensive set of fast, built-in solvers for Linear, Nonlinear (convex & nonconvex/Global), Quadratic, Quadratically Constrained, Second Order Cone, Semi-Definite, Stochastic, and Integer optimization. You never have to specify or load a separate solver, because LINGO and What'sBest! read your formulation and automatically select the appropriate solver. Brand new releases of LINGO and What'sBest! include a host of state-of-the-art features that boost performance and extend the range of applications.

Find out how easy it is for you to begin modeling your most challenging models today. Contact us to get a free trial of the full unrestricted capacity version of LINGO or What'sBest! with access to all of the solvers. If you are a professor or student you should contact us for a free educational research license.
